The Corporation's products and services are intended for the following five principal segments of the non-residential construction market: office towers and high-rises, commercial and recreational buildings, airport facilities, industrial complexes, and transport infrastructures.

NOTE 2 BASIS OF PREPARATION

a) **Statement of Compliance**

The Corporation prepares its financial statements in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"), applicable to interim financial reports, including International Accounting Standard 34, "Interim Financial Reporting". These condensed interim consolidated financial statements are intended to provide an update on the annual Audited Consolidated Financial Statements of January 31, 2015. Accordingly, they do not include all of the information required for annual financial statements and must be read in conjunction with the Corporation's annual Audited Consolidated Financial Statements as at January 31, 2015.

The Board of Directors approved these condensed interim consolidated financial statements on June 9, 2015. These financial statements have been prepared using the same accounting policies as outlined in Note 2 to Corporation's Audited Consolidated Financial Statements for the Fiscal Year Ended January 31, 2015.

b) **Basis of Assessment**

These consolidated financial statements have been prepared under the historical cost convention, except for the evaluation of certain financial instruments measured at the fair value. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

c) **Functional and Reporting Currency**

Items included in each of the Corporation's entities financial statements are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The Corporation's functional currencies are the Canadian dollar for its Canadian entity, and the U.S. dollar for its U.S. entities. The interim consolidated financial statements are presented in Canadian dollars, which is the Corporation's reporting currency. All amounts are rounded to the nearest thousand dollars, except where otherwise indicated.

d) **Use of Estimates and Judgments**

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Corporation's accounting policies. Areas involving a greater degree of judgment or complexity, or areas where assumptions and estimates have a significant impact on the consolidated financial statements, are disclosed in Note 5 to the Corporation's Audited Consolidated Financial Statements for the Fiscal Year Ended January 31, 2015, and remained unchanged for the three-month period ended April 30, 2015.

NOTE 3 RECENT IFRS PRONOUNCEMENTS NOT YET ADOPTED

A summary of recent IFRS pronouncements not yet adopted is included in Note 4 of the annual financial statements of January 31, 2015, and consists of the IFRS 15 "Revenue from Contracts with Customers" published by the IASB in May 2014 as well as the IFRS 9 "Financial Instruments" published by the IASB in November 2009. The Corporation has not yet assessed the impact of the adoption of this standard on its consolidated financial statements.

There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Corporation.

b) **Subordinate Voting Shares Redemption**

On May 30, 2014, the Corporation announced that it had received the approval from its Board of Directors and the Toronto Stock Exchange to renew its normal course issuer bid ("NCIB"), under which it could repurchase, for cancellation purposes, up to 1,375,824 of its subordinate voting shares between June 4, 2014 and June 3, 2015. These 1,375,824 shares represented approximately 10% of the public float of adjusted subordinate voting shares. These shares will be repurchased from time to time when deemed appropriate by the Corporation, while considering the economic conditions and its liquidities. As mentioned in the following paragraph, except for the shares repurchased, no other shares were repurchased during the three-month periods ended April 30, 2015 and 2014.

The Corporation repurchased 750,000 subordinate voting shares held by three of its directors, pursuant to the exercise of the stock options awarded to them in April 2005, for a total amount of $2,139,000 ($2.85 per share) including a disbursement of $1,800,000 ($2.40 per share) and $339,000 to contributed surplus. In the context of the share repurchase, the Corporation amended its NCIB in order to specifically authorize off-Exchange purchases under the exemptions provided under applicable securities legislation or issued by securities regulatory authorities. In accordance with the Toronto Stock Exchange's rules, the share repurchase was factored in the computation of the annual aggregate limit of shares eligible for buyback by the Corporation under the NCIB. Therefore, following this transaction, a balance of 625,824 shares would have been eligible for repurchase until June 3, 2015, under the NCIB.

c) **Dividends**

d) **Stock Option Plan**

At April 30, 2015, a total of 3,426,029 subordinate voting shares (3,426,029 shares as at January 31, 2015) were reserved for the Stock Option Plan, of which 1,329,029 shares as at April 30, 2015 (1,324,029 shares as at January 31, 2015), had not yet been granted.

These options start vesting one year after the grant date, at the rate of 20% per year, except those issued on February 20, 2007, which vested at a rate of 50% per year, and those issued on July 17, 2009 and December 14, 2009, having an acquisition rate of 33% per year, commencing at these dates. No options were granted during the three-month period ended April 30, 2015. The weighted average fair value of the options granted during the three-month periods ended April 30, 2014 was estimated at $2.45 at the grant date using the Black-Scholes option pricing model on the basis of the following weighted average assumptions for the options granted:

Three-month period ended April 30, 2014	
Issuance date	April 15, 2014
Options issued (in units)	10,000
Annual share dividend yield	0.73%
Stock price	$2.74
Expected volatility (1)	40% to 53%
Risk-free interest rate (2)	1.37% to 2.17%
Expected life (3)	4 to 8 years

(1) The expected volatility considers the historic volatility of the Corporation's share price.
(2) The risk-free interest rate used to determine the fair value at the issuance of the options is based on a yield curve for zero-coupon bonds from the Bank of Canada.
(3) The contractual expected life of the issued options is 10 years.

e) **Deferred Share Units Plan ("DSU")**

During the three-month periods ended April 30, 2015 and 2014, the DSU compensation amounted to $14,000 and $15,000 respectively, each representing 6,137 units and 5,007 units, and are recorded in "Accounts payable and other current liabilities" in the Consolidated Statements of Financial Position.

Three-month periods ended April 30,	**2015**	2014
(Number of deferred share units)		
Outstanding, at the beginning of the period	**175,645**	153,119
Attributed	**6,137**	5,007
Outstanding, at the end of the period	**181,782**	158,126

The DSU are re-evaluated at fair market value at the end of each reporting period until the vesting date, using the market price of the Corporation's subordinate voting shares. During the three-month period ended April 30, 2015, an upward re-evaluation in the amount of $23,000 was recorded as an increase in compensation expense, with the consideration recorded as an increase in accounts payable and other current liabilities in the Consolidated Statement of Financial Position.

For the three-month periods ended April 30, 2014, this re-evaluation resulted in a decrease of $73,000 in compensation expense and accounts payable and other current liabilities.

(1) To protect itself against the foreign exchange risk related to net investments in its foreign subsidiaries, the Corporation used hedge accounting until July 2014 by fully designating one of its US-denominated long-term debts as a hedge. However, because this long-term debt was fully reimbursed in July 2014, hedge accounting ceased to apply on that date.

(2) Net of an income tax expense of $2,000 during three-month period ended April 30, 2014 (no hedging for the three-month period ended April 30, 2015).

(3) The component "Translation of foreign operations" represents exchange differences relating to the translation from the functional currencies of the Corporation's foreign operations into Canadian dollars. On disposal of a foreign operation, the cumulative translation differences are reclassified to the Consolidated Statement of Income as part of the gain or loss on disposal.

(4) The component "Available-for-sale financial assets" arises upon the revaluation of available-for-sale financial assets. When a revaluated financial asset is sold, the portion of the component that relates to that financial asset, and is effectively realized, is recognized in the Consolidated Statement of Income. When a revaluated financial asset is impaired, the portion of the component that relates to that financial asset is recognized in Consolidated Statement of Income.

NOTE 18 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

a) **Financial Risk Management**

As described in Note 29 to the Audited Consolidated Financial Statements for the fiscal year ended January 31, 2015, the Corporation is exposed to exchange rate fluctuations between the Canadian and U.S. dollars, since a significant portion of its revenues is generally recorded in U.S. dollars. During the three-month period ended April 30, 2015, 66% of the Corporation's revenues were concluded in U.S. dollars (21% during the fiscal year ended January 31, 2015). As part of its foreign currency hedge policy, the Corporation uses different mechanisms, where appropriate, to mitigate the impact of these fluctuations on its results, such as:

— Maximizing purchases in U.S. dollars when possible to avail itself of a natural hedging;
— Acquiring fabrication equipment in U.S. dollars;
— Converting long-term debt into U.S. dollars;
— Using hedging accounting; and
— Using forward foreign exchange contracts to hedge part of the residual exchange risk.

The detail of the derivative financial instruments on hand as at April 30, 2015, was established as follows:

	As at April 30, 2015			
	In thousands of $US [(1)]	In thousands $CA [(1)]	Average rate	Expiration date

(1) A positive amount represents the sale of U.S. dollars, whereas a negative amount represents the purchase of U.S. dollars.

The Corporation's position is summarized below:

As at	**April 30, 2015**	January 31, 2015
(In thousands of CA$)	**$**	$
Current liabilities relating to derivative financial instruments:		
Forward foreign exchange contracts	**181**	885
Foreign currency options	**52**	230
	233	1,115

b) **Financial Instruments**

Financial assets and liabilities have been classified in categories specifying their basis for measurement, and in the case of items measured at fair value specifying whether changes in the fair value are recognized in the net income or in other comprehensive income. These categories are: fair value through net income, loans and receivables, assets available-for-sale and, in the case of liabilities, amortized cost.

As at April 30, 2015, the carrying amount of these financial instruments did not significantly differ from the fair market value, either because of their forthcoming maturity date (in the case of cash, cash equivalents, short-term investments, accounts receivable, holdbacks on contracts receivable and accounts payable and other current liabilities), or because the Corporation believed it could obtain similar conditions and schedules (in the case of the long-term debt) or since they are re-evaluated at their fair value at the end of every period (in the case of equity investments and derivative financial instruments).

Therefore, to determine fair value, the financial instruments measured at the fair value at the Consolidated Statements of Financial Position are classified using the following fair value hierarchies in accordance with IFRS, which have been defined as follows:

— Fair value - Level 1: Quoted price (unadjusted) in active markets for identical assets or liabilities;

— Fair value - Level 2: For inputs, other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. prices) or indirectly (i.e. derived from prices); and

— Fair value - Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Corporation classified its equity investments within fair value level 1, since they are based on inputs that are observable in an active market.

The Corporation classified its derivative financial instruments, which include forward foreign exchange contracts and foreign currency options within fair value level 2, since they are essentially based on inputs that are observable other than in an active market.
